PROFESSIONAL SUMMARY

Full Stack Software Engineer with production experience building real-estate SaaS applications in TypeScript, JavaScript, React, Next.js, Node.js, Express.js, and PostgreSQL. Builds REST APIs, authentication and authorization flows, and third-party payment and messaging integrations, deployed as containerized services with CI/CD. Contributed to a multi-tenant CRM migration across 34 PostgreSQL tables, remediated a production authentication bypass, and shipped customer-facing features across two live applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React, Next.js, App Router, Server-Side Rendering (SSR), Redux Toolkit, Tailwind CSS, Radix UI

Backend: Node.js, Express.js, REST APIs, Layered Architecture

Database: PostgreSQL, Supabase, Row-Level Security (RLS), Parameterized SQL, pg

Security: JWT, bcrypt, Authentication, Authorization, Multi-Tenant Isolation, API Security, Webhook Signature Verification

Integrations: WhatsApp Business Cloud API, Razorpay, Google Places API, Nodemailer, SMTP

DevOps & Cloud: Docker, Docker Compose, GitHub Actions, CI/CD, Netlify, S3-Compatible Object Storage

Tools: Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | NearEstate | [Live Demo](#)

Jul 2026 - Present

Tirupati, India

Contributed to two production real-estate applications, working across frontend development, backend APIs, PostgreSQL, authentication, security, third-party integrations, and deployment.

RealView360 | Property Discovery Platform *Next.js 16, React 19, Redux Toolkit, Express.js, PostgreSQL*

- Developed customer-facing features using Next.js 16, React 19, and Redux Toolkit, combining server-rendered pages for SEO-sensitive property listings with interactive client components for search and 360° virtual tours.
- Developed backend workflows using Express.js with route, controller, and service layers, integrating the frontend through Next.js server-side API rewrites.
- Implemented and maintained PostgreSQL workflows using parameterized raw SQL through the pg library across authentication, properties, leads, billing, and subscription domains.
- Integrated external services including WhatsApp Business Cloud API, Razorpay, Google Places API, Nodemailer/SMTP, and S3-compatible object storage; containerized application services with Docker Compose.

CRM.NearEstate | Multi-Tenant Real Estate CRM *Next.js, Express.js, PostgreSQL, REST APIs*

- Contributed to the migration from a single-tenant CRM to a multi-tenant SaaS architecture, enforcing tenant-scoped access across 34 PostgreSQL tables and 24+ API modules.
- Identified and remediated a production authentication bypass and unintended database exposure, strengthening tenant isolation and preventing unauthorized cross-tenant data access.
- Implemented tenant-specific WhatsApp Business Cloud API credential resolution and webhook signature verification, with pacing and automatic retries for failed and rate-limited broadcasts.
- Improved core CRM workflows including contact pagination, full-table search, CSV imports, follow-ups, password reset, and inbox-to-contact flows; contributed to production deployment using Docker and GitHub Actions.

PROJECTS

The Wild Oasis | Hotel Management Dashboard *React, React Query, Supabase, React Hook Form*

- Built a responsive hotel-management dashboard with reusable components and CRUD workflows for cabins, bookings, and guests; implemented server-state caching and validated forms using React Query and React Hook Form.

usePopcorn | Movie Search Application *React, JavaScript, REST API, Local Storage* | [Live Demo](#)

- Built a movie search application using the OMDb REST API with search, ratings, detailed views, reusable custom hooks, and persistent watched-movie data.

EDUCATION

B.Tech, Electronics & Communication Engineering

2026

Annamacharya Institute of Technology and Sciences, Tirupati
